DISCLOSURES

Reinhart Mid Cap PMV Fund, previously known as Reinhart Mid Cap Private Market Value Fund, changed its name on September 28, 2016.

The Russell Midcap Value Index measures the performance of those Russell Midcap companies with lower price-to-book ratios and lower forecasted growth values. Index returns are provided for comparison purposes to represent the investment existing during the time periods shown. An index is fully invested, includes the reinvestment of dividends and capital gains, but does not include any transaction costs, management fees, or other costs. One cannot invest directly in an index.

Mutual fund investing involves risk. Principal loss is possible. Investing in medium-sized companies involves greater risks than those associated with investing in large company stocks, such as business risk, significant stock price fluctuations, and illiquidity. Investments in Real Estate Investment Trusts (REITs) involve additional risks such as declines in the value of real estate and increased susceptibility to adverse economic or regulatory developments.

The fund's investment objectives, risks, charges and expenses must be considered carefully before investing. The prospectus contains this and other important information about the investment company, and it may be obtained by calling 1-855-774-3863, or visiting www.reinhartfunds.com. Read it carefully before investing.

While the fund is no-load, management and other expenses still apply.
