Mutual fund investing involves risk. Principal loss is possible. Investing in small and medium-sized companies involves greater risks than those associated with investing in large company stocks, such as business risk, significant stock price fluctuations, and illiquidity. Investments in securities of foreign issuers involve risks not ordinarily associated with investments in securities and instruments of U.S. issuers, including risks relating to political, social, and economic developments abroad, differences between U.S. and foreign regulatory and accounting requirements, tax risks, and market practices, as well as fluctuations in foreign currencies.

One cannot invest directly in an index.
