**This report describes changes to the Fund that occurred during the reporting period.**

## WHAT WERE THE FUND COSTS FOR THE PAST YEAR? (based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Investor Class	\$136	1.20%

## HOW DID THE FUND PERFORM LAST YEAR AND WHAT AFFECTED ITS PERFORMANCE?

The Reinhart Genesis PMV Fund – Investor Class generated a return of +27.04% for the twelve-month period ended May 31, 2024, essentially inline with the Russell 3000 Index return of +27.58% over the same period. Given our focus on smaller capitalization companies and Private Market Value valuation discipline, we are pleased with these results given two stylistic headwinds during the period: 1) large-capitalization companies outperformed small-capitalization companies by nearly 800 bps during the period (Russell 1000 Index +28.01% vs. Russell 2000 Index +20.13%) and 2) Growth outperformed Value by over 1000 bps (Russell 3000 Growth Index +32.81% vs. Russell 3000 Value Index +21.71%). Within the portfolio, stock selection offset negative sector allocation. At the sector level, Consumer Staples (one stock) and Financials were the largest relative contributors while Information Technology and Real Estate were a drag during the period. Finally, with just four new purchases and two complete sales during the trailing fiscal year, portfolio activity has remained subdued as we continue to believe our companies are well-positioned and attractively valued.

## HOW DID THE FUND PERFORM SINCE INCEPTION?¹

The \$10,000 chart reflects a hypothetical \$10,000 investment in the class of shares noted and assumes the maximum sales charge. The chart uses total return NAV performance and assumes reinvestment of dividends and capital gains. Fund expenses, including 12b-1 fees, management fees and other expenses were deducted.
